The Public Schools. We have not the means of knowing what degree of 'clasticity' the Inspector of Public Schools proposes imparting to the existing law, during the present session; but we may say that 'elasticity' is not alone necessary in order to the effectual working of the system. Inasmuch as a new Bill is not to be expected from the present Legislature, it is, perhaps, as well that its action should be confined to imparting greater 'elasticity' to the old one, with the hope that it can be kept in motion until a new dispensation shall have imparted greater 'elasticity' to our poliatical system. We trust the question of Education, coming up, as it will, near the close of an eventful session, will not be slurred over as if it were a matter of secondary importance, but that it will receive attention in some degree commensurate with its importance. There are few questions that are of greater public concernment, or that have a stronger claim upon the attention of the Legislature than that of education. Whether or not the public are concerned about it is another question. Were we to measure the importance of the subject by the degree of interest it appears to evoke in this community, it is to be feared that it would have little claim to the prominence which we wish to give it. The apathy exhibited by the principal community in the Colony upon this subject constitutes the most discour aging circumstance with which the friends of popular education have to contend. But we wish to point out the danger of improper use being made of this circumstance by wellmeaning persons. Does this indifference to the subject, on the part of the people of Victoria really constitute a legitimate argument against Legislative and Executive action? It occars to us that the reverse may be the case. If it be true that knowledge is power, if a liberal education for the masses constitutes the only safe basis of liberal institutions, the only true foundation of national greatness, a morbid indifference to educational matters on the part of the people increases rather than diminishes the necessity for legislative solicitude and executive action. Instead, therefore, of referring to the stolid indifference of the people as an excuse for leaving the educational interesta of the country in the wretched condition in which they now are, that diseased state of the public mind ought to be regarded as an alarming symptom demanding prompt and thorough treat-ment. We would not, in view of all the circumstances, advocate an attempt at framing a new educational system during the present session; but we would most earnestly urge that, in dealing with the old law, the 'elasticity' imparted to it may be of a sufficiently thorough and radical character to enable the public schools to be re-opened and efficiently worked until time as new and more perfect machinery can be brought into working order The sum of fifteen thousand dollars has been set apart for educational purposes this year. That sum would not be adequate to defray the entire expense of maintaining the public achools; and yet, in the hands of the Inspector power to apply it towards educating the greatest possible number, having due regard to local effort, that sum would go far towards meeting present need. We trust, therefore, that all cramping and unworkable restrictions may be eliminated from the present Bil, so that the greatest possible amount of good may be attained during the present year with the amount of money available for edu-cational purposes. And, we would desire to impress upon the Government cational purposes. And, we would desire to impress upon the Government the necessity for promptitude in this matter. We are now well into the second month, and the public makes!

Thomson's Road Steamers. The proposition to grant certain legislative encouragement for the introduction into this colony of Thomson's Patent Road Steamer has evoked opposition since we last referred so the subject. We cannot say that the circumstance surprises us. Such has ever been the fate of all great improvements. In weighing and estimating the value of such opposition it is often an advantage to trace it up to its source and get at motives; and in nice cases out of ten it will be found that those who profess the greatest zeal for guarding the public interests have hidden away a motive which is the quintessence of selfishness. Probably the only objection urged against the proposition to encourage the introduction of these steamers deserving of any consideration at our hands is the assertion that the parties seeking legislation want a monopoly of the use of road steamers on the nopoly of the use of roas steamers on the trunk road on the Mainland for a certain period. We yield to none in sensitiveness regarding the principle of monopoly; and yal, with all our prejudice against it we have had to approve of the principle more than once, as applied to great enterprises in this once, as applied to great enterprises in this colony; and it has sometimes been presented

be exhibited in this instance, the enemie the enterprise themselves being the judges. But we must plainly deny that a monopoly of the use of road steamors is acked. As was shown in a previous article. protection is only sought in respect of one particular patent; and, as was intimated on a previous occasion, there are already newer patents in successful operation, any of which would be perfectly free to come into competition with Thomson's patent, to say nothing of others certain to be invented long before the expiration of the period sought to be covered by the bill; for it cannot be thought that Thomson possesses a monopoly of in-venitive genius, and that all scientisto pro-gress shall die with him. A correspondent of the London Telegraph announces that the Germans are using a newer patent than Thomson's and with the greatest success. Says the correspondent, 'One of these irso-tion engines of fourteen horse-power took in towart Pont-a-Musson a train of twelve in tow at Pont-a-Mousson a train of twelve wagons, loaded heavily with provision stores and fastened together with chains, and drew the train over steep hills and through moddy valleys, a distance of thirty mikes, in eighten hours, picking up its luel and water on the way. The actual running time was twelve hours—six hours being consumed in getting fuel from fences and other material along the road. For balling heavy guns over common roads they are of priceless over common roads they are of priceless value. The driving which of the engines have a trae eighteen inches broad. Those used by the Germans are without the robber used by the derimans are wholed the label to the tire which has been so much praised, the tire being of steel with a few projections or thin flat bers running across the surface. Their rate of speed with a heavy load is from three to five miles an hour.' In view of such facts as these it is idle to pretend that a monoply of the use of road steamers is sought.

PRIVATERRING. - By all means let our PRIVATERANG. — By all means let our merchants generally usite, as the Chamber of Commerce proposes, in orging upon the Government the importance of seizing the present opportunity for securing the abolition of privateering. We unwisely declined the proposed treaty of 1856 because we fancied it was not positive enough in its declarations. The Fernot-Charmon war has lately illustra-The French-German war has lately illustrated the great advantages which that treaty would have given us, and has inclined the European nations to consect to its extension. The opportunity to secure the total abolition of privateering is, therefore, most favorable and we ought not to heitate to repair the folly committed 14 years ago. In view of the fact that it refused the treaty of 1856, this Government ought to take an early ini-tiative in opening negotiations for the exten-sion of the treaty. The Chamber of Com-merce is to hold a special meeting to urge this important matter on the attention of the President. It ought to be large in numbers and emphatic in expression.—New York Tri-

HEALTH HAS A BEAUTY OF ITS OWN. No cruptions, sores or discolorations disfigure or annoy the man or woman whose stomach, liver and bowels do their duty thoroughly. To compel them to their work, to render it impossible for them to do it in a slovenly, imperfect, way, it is only necessary to take a few doses of "Dr. Walker's Vinegar Bitters." This potent vogetable specific renovates every weakened organ and controls every disordered function.

The Proclivities for beneation.

The Proclivities for beneation—It is as tonishing that in this modern, and supposed to be more refined age, that a custom still exists which originated in the Fifteenth Century from an accidental circumstance of Maids and Bachelors amusing themselves on the 14th of February, by drawing lottery-wise, a name to be taken seriously or in joke, to represent their tuture wives or husbands. This custom moderinized, exhibits the same tendency, in the form of Valentines. Some chaste in appearance and sentiment, and others grotesque and calculated to please or offend. T. N. Hibben & Co. are prepared for the coming St. Valentine's Day in the modern and most pleasing form.

Legislative Council.

Tunebay, Feb 7th, 1871.

Council met at 1:30 p.m. Present—The hon Speaker, hon Chief Commissioner, hos Attorney-General, hon Collector of Customs, hon Dr Helmcken, hon Dr Carrall, Mr Alston, Mr Pemberton, Mr Skinner Mr Nathan, Mr Nelson, Mr Cornwall, Mr DeCosmos, and Mr Humphreys.

Minutes of the last meeting read and con-

NOTICES.

Mr Humphreys gave notice that he would move an address to the Governor recommending that compensation may be made to all acting postmasters on the Mainland not now paid for their services.

The hon Dr Helmcken gave notice of a address to His Excellency the Governor, as

Whereas by the 11th section of the proposed Whereas by the 11th section of the proposed terms of Union of this colony with the Dominion of Canada It is provided that a railway shall be constructed from the Pacific towards the Rocky Mountains, and from the Canadian system of railways towards the seaboard of British Columbia; and whereas the locality upon the Pacific at which such railway shall have its starting point or principal station has been left an open question and remains yot to be determined and fixed upon, and whereas the seat of Government of this colony is at Victoria, the largest most populous and chief commercial city of British Columbia, and contiguous to the harbour of Esquimait, the station and deckyard of Her Majesty's an val forces on the North Pacific; and whereas varioness on the North Pacific; and whereas it would materially conduce to the resources of the railway and the welfare of the Domin it would materially conduce to the resources of the railway and the welfare of the Dominion at large and meet the requirements of Her Majesty's naval forces, the defence of the country and the interests of commerce, were they connected with the highway.

This Council is of opinion that it is advisable and necessary that Victoria and Esquimant should be connected with the initial

malt should be connected with the initial point or principal section of such railway upon the Paoific, either by means of a continuous line of railway or, should that be found inconvenient then in that case by means of steamboats or partly by railway and partly by steamboat, so that the railway may, by conby steamboat, so that the railway may, by connecting with the seat of Government and chief commercial city of British Columbia and the station of Her Majesty's naval forces in the North Pacific, be and constitute really and truly a great national undertaking and the national highway from the Atlantic to the national highway from the Atlantic to the Pacific shores and from the Pacific to the Atlantic shores; This Council would, therefore, respectfully

urge upon the Government of Canada the ne-cessity of making provision so to connect Vic-toria and Esquimait with the proposed rail-way from the Pacific towards the Rocky Moun-

This Council respectfully requests His Excellency the Government of the Dominion of Canada.

ORDERS OF THE DAY.

ORDERS OF THE DAY.

The order for the third reading of the Constitution Bill having been taken up, the hon Attorney-General moved for the recommittal of the Bill, in order that the number of Electoral Districts mentioned therein might be changed from thirteen to twelvo, so as to conform to the alteration made in the schedule by amalgamating the two districts of Chemainis and Cowichan.

The Bill was recommitted accordingly, Mr Alston in the Chair. Having been reported with amendment, the Bill was read a kird time and passed.

LOAN INVESTMENT BILL.

LOAN INVESTMENT BILL

The hon Dr Carrall asked that this bill might be postponed till Wednesday of next week, as it was not in a state of readiness for a second reading.—Postponed accordingly.

MECHANICS' INSTITUTE BILL

The House went into Committee of the Whole upon this Bill, the Hon. the Collector of Customs in the Chart.

Section 1 having been read, the Hon Dr Carrell suggested whether the measure might

not with advantage be made broad enough to embrace Benevolent Societies. Hon Attorney General and Mr Alston both opposed such a proposition

out that the same provisions could not be made to suit two classes of organization so dissimilar in their nature and objects. then gone

LORD BURY'S BRITISH PACIFIC RAILROAD SPEECH .- Lord Bury in a recent speech at Toronto, Canada, alluding to the proposed Confederation of the British American Colonies, spoke as follows :

" While in England I was one of a deputation upon the subject to the Chanceller of Exchequer and Coloulal Minister, and they both expressed themselves warmly in its favor as ellipial reserve would allow of. But before giving any final answer, they waited the state of the subject of t until some definite action should be given to the Crown. Gentlemen, is my business here to get that definite action, and if you accept the terms, you will in a short time see a railroad through British territory from here to the Pacific. [Cheers.] It is impossible not to see that Canada must eventually besome the great carrying way of the world.
[Cheers.] With your noble river—so well
canalled—your splentid chain of lakes—and
your rivers running from those lakes into Lake Winnepeg, and almost to the fort the Rocky Mountains—you have magnifi-cent natural advantages—and we cannot look on those natural leatures without seeing that over those plains of the Saskatenewan must lie your Pacific Rrilroad; and that through the gap near its head waters must pass that great railroad to the West. [Cheers.] I feel, geotlemen, that it is no visionary project to say that before long a ship canal, a railroad, and a telegraph will be constructed ed between the Atlantic and the Pacific [Cheers.] I am. gentleman, also interes ed nstruction of a Pacific railway."-Victoria Guzette, 1858.

REAL E-TATE is decidedly improving in value. At the sale of property by Mr Lumley Franklin held yesterday there was a much better spirit evinced in bidding and although there was no marked advance in prices still it seemed to be the impression that higher rates would soon be obtained and many persons who of lare years have been afraid to invest in land are now apparbeen afraid to invest in land are now appar-early desirous of taking advantage of the present favorable opportunity to purchase city and country property in view of the future prospects of the colony. The Future.

EDITOR BRITISH COLONIAT : - It is some comfort at length to reflect that after so many years of commercial despondency we can now look forward hopefully for a change, one that very shortly will advance every interest, whether of commerce, agriculture or landed property to a degree in my opinion not previously attained in the colony. Allow me briefly to call attention to the causes which these opinious are founded:

Firstly—The great scheme of Confedera-tion, which is, we may say, nearly fail ac-compli. Under it we shall be out of debt; we shall have a free government, here and a as it were, par oral guardianship to look after our interests at Ottawa. Our yearly income will be large, our expenditure comparatively light. Labor will find a ready demand in the various works to be carried on soon after its consummation, for the purpose of constructing

The great Railway to Canada.
The Telegraph,
The Penitentiary.
The Dry Dock at Esquimalt,

The Marine Hospital in Victoria, The opening and improvement of Roads, Trails and Bridges, In the competition of those important undertakings the aid of societies formed in Bagland and elsewhere for that purpose will be applied to promote and assist immigra-tion, which will doubtless flow rapidly into

the colony,
Our sream communication with San Fran sisco twice a month and with the Sound wice a week, with the Skeena River and our agricultural districts will give an impe community and result in the graqual setting

up of the country.

Our mines this year promise to be more productive than for many years. Of the richness of Omineca there appears to be little doubt, and new discoveries will probably be made in that auriferous section. Wil-ham, Grouse and Lightning Creeks are likely to yistd better results than heretofore. These will naturally attract numbers of adventu-rous gold seeker, not alone from various pars of British Columbia but also from the neighboring Territory and California.

Altogether I think we may congratulate ourselves on having new fairly weathered the storms of outrageous fortune, and arrive at the conclusion, founded in natural causes that our colony will advance with rapid strides on the tide of fortune in the future.

Dominion Mail Summary.

Our Canadian exchanges are to the 18th the result of the Manitoba elections is pubfished. The electrons appear all to have passed off quietly, with one single exception, that of the Winnipee and St John's Division, in which the candidates were McDonald smith and Dr Shultz. The latter was beaten by a mejority of seven votes. The Dominion Board of Trade was in

session at Ottawa. Delegates from the va-

rious Provinces were in attendance.

The Ontario Legislature was occupied with the new School Bill, some of the provisions of which thicited considerable opposition. The compulsory attendance clause was, very properly we think, so far modified as not to compal Roman Catholic parents to send their children to the public schools, and to exempt Protestant parents from sending their children to Roman Catholic separate schools.
The Canada Temperance Union was hold-

ing a convention at Torouto.

The commander of the marine police schooner Water Lily on the 14 h seized an American fishing vessel named Persoverance

for fishing inshore. The captured vessel was taken to St John for adjudication.

The Hon William Macdougall has received a requisition, influentially signed, to address the people of St John, New Brunswick, upon the political topics of the day, and especially regarding the Northwest. Mr Medougat consented. Writs for the Manitoba elections for the

House of Commons had been despatched from Ottawa. SIGNIFICANT. -- At a recent meeting in

Manchester (Eng) Judge Haliburton, the well-known author of 'Sam Slick,' declared that 10 a very short time the trade with Chica would be ca ried on mainly through port of Liverpool, a route two thousand five bundred miles shorter than the present one. This evidently alludes to the indicad from Halifax to Frazer river, which there is some talk of constructing.—Gazette, 1858. A. GILMORE, MERCHANT TAILOR, and Gen-

Washington, Feb 6-On the metion of Stowart, the Senate took up the bill to de-fine and protect the rights of miners and encourage the development G mines, which was amended at the engine of the Assembly and passed. It provides facilities for obtaining patents to mining lands and means to facilitate mining litigation and enable parties to take up a certain amount of land on each side of mining claims for lum-bering, milling and other purposes. The motion of Williams to take up claims for extra services for carrying mails to Utah and Oregon, involving \$100 000, gave rise to some discussion, in which was seen the ne-cessary for greater vigilance in private legislation in view of the extent to which the government has been imposed on in con-tracting. The claim bill was taken up and recommended to Committee on Post Offices.

TOPHYSICIANS.

Allow me to call your attention to my PREPARATION
OF COMPOUND EXTRACT BUCHU, the component parts O, BUOHU, LONG LEAF, CUBEBS, JUNIPER BERRIES:

Mode of Preference Buchu, in vacuo. Juniper Borgles, by distillation, to form a fluo gin. It is extract of by displacement with spirits obtained from Juniper Borries; your jittle sugar is used and a small preportion of apirit. It is more paintable than any new nuse.

Buchu as prepared by Druggists, is of a dark color. It is a plant that emits its fragrance; the action of a flame destroys this (its active principle), leaving a dark and glutinous decoction. Muce is the color of ingredients glutinous decortion. Mine is the color of ingredients
The Buchu in my preparation predominates he smallest
quantity of the other ingredients are added, to prevent
fermentation; upon inspection it will be found not to be
a Theture, as made in Pharmacopus, nor is it a Syrup—
and therefore can be need in cases, where fover or inamation exists. In this you have the knowledge of the
ngredients and the mode of preparation

Hoping that you will favor it with a trial, and that pon inspection it will meet with your approbation.

With a feeling of profound confidence.
